

RESTRICTED ELECTIVES
FOR
ANIMAL AND POULTRY SCIENCES MAJORS
For Students Graduating 2021 or Later

PRE-VET OPTION

The **Pre-Vet Option** is designed to help students meet admission requirements for colleges of veterinary medicine. In addition to the 19 required pre-vet credits, 11 to 15 credits (depending on the emphasis chosen – livestock, poultry, equine or companion/lab animal and their specific requirements) are chosen from science, business and/or agricultural/applied electives to allow a student to broaden the base of expertise or pursue a particular area of interest. The set of courses which fulfill the restricted elective requirement should be developed with the student's advisor, submitted in writing to the Advising Office, and placed in the student's record prior to taking the courses.

Requirements for the Pre-Vet Option in APSC differ from VMCVM requirements (<https://www.vetmed.vt.edu/academics/dvm/admissions/requirements.asp>). Students are responsible for ensuring that they fulfill prerequisite requirements for the vet schools to which they are applying.

Additional courses recommended for pre-vet students include:

ALS/BIOL 4554 Neurochemical Regulation

BIOL 2614 Gen. Microbiol Lab

BIOL 4664 Virology

BIOL 2104 Cell & Molecular Biology

BIOL 2504 General Zoology

BIOL 3454 Intro to Parasitology

BIOL 2004 Intro to Genetics

BIOL 4674 Pathogenic Bacteriology

BIOL 4704 Immunology

BMVS 4024 Diseases of Poultry

BIOL 4104 Developmental Biology

***HNFE 2204** Medical Terminology

*Required by VMCVM

NOTE: At least 9 of the 38 total restricted electives must be 4XXX including the chosen production course (APSC 4404, 4414, 4424, 4444 or 4464). Don't forget to take this into account when choosing electives.

See pages 2 and 3 of the APSC degree checksheet for other restricted electives
