**Current Health Status of the Virginia Tech Beef Herd**

Our goal is to sell the healthiest cattle possible and our current health program is outlined in the sale catalog (page 4). We voluntarily test each year for Johnes' and Bovine Leukosis Virus in an attempt to maintain a high standard.

Our goal is to be transparent as possible with the quality and health of our cattle. If you have any questions about the health of the sale animals, please see Dan Eversole or Chad Joines.

As always, we appreciate your support of the Hokie Harvest Sale!

Breeding-age bulls and fall-calving cows were vaccinated on 10/24/23 with Pyramid 10 for pre-breeding purposes. Spring-born calves were dewormed with Cydectin pour-on and have received a second dose of Vision 7 on 10/12/23. Lots 3A and 4A were calf-hood vaccinated on 9/22/23. Fall-born calves were injected with Vision 7 on 10/24/23.
